# SAP Concur Partner

cardata

The Fully Managed Vehicle Reimbursement Partner

Cardata integrates with Concur Expense to streamline mileage expense reporting so that you can provide accurate and fair reimbursements for all drivers.

Leveraging IRS regulations and a database of cost information, our experts match employees with optimized reimbursements relative to their locations and job specifications.

Cardata's end-to-end reimbursement management pairs compliance services with simple mileage capture tools to pay employees fairly and tax-free, the right way.
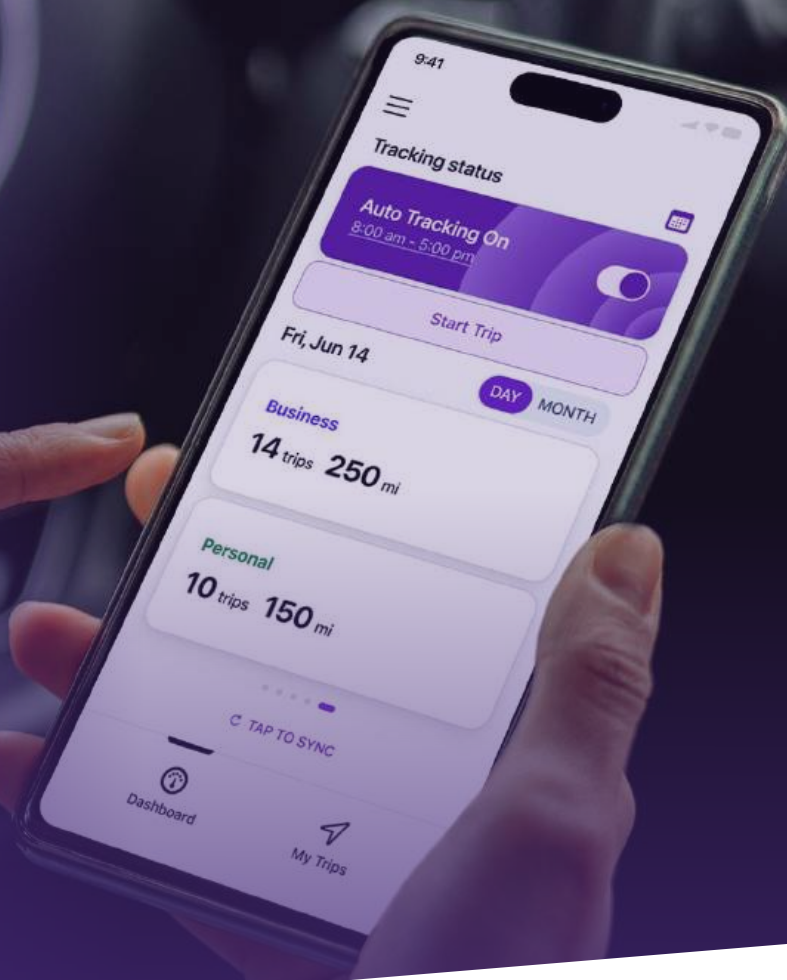

Why Cardata & SAP Concur?

Have the peace of mind that you're doing mileage right

If employees drive over 5,000 miles a year, traditional mileage reimbursement falls short. Your high mileage drivers have unique needs; their vehicle's wear and tear is often over or underpaid using old school methods. Lean on Cardata's insights to ensure fair payments.

Uncover financial savings of over 30% by eliminating waste

We replace outdated car programs such as manual mileage submissions, taxable allowances and expensive company cars with data driven, tax-free reimbursements. Keep costs low, avoid FICA and income tax, while putting money back into everyone's pockets.

Refocus on what matters most while we do the rest

Cardata makes IRS compliance accessible and saves you time. Pairing easy-to-use software, insurance verification, and top rated customer service, we manage your program with care. Remove your burden, reduce your risk, and keep payments cost efficient for years to come.
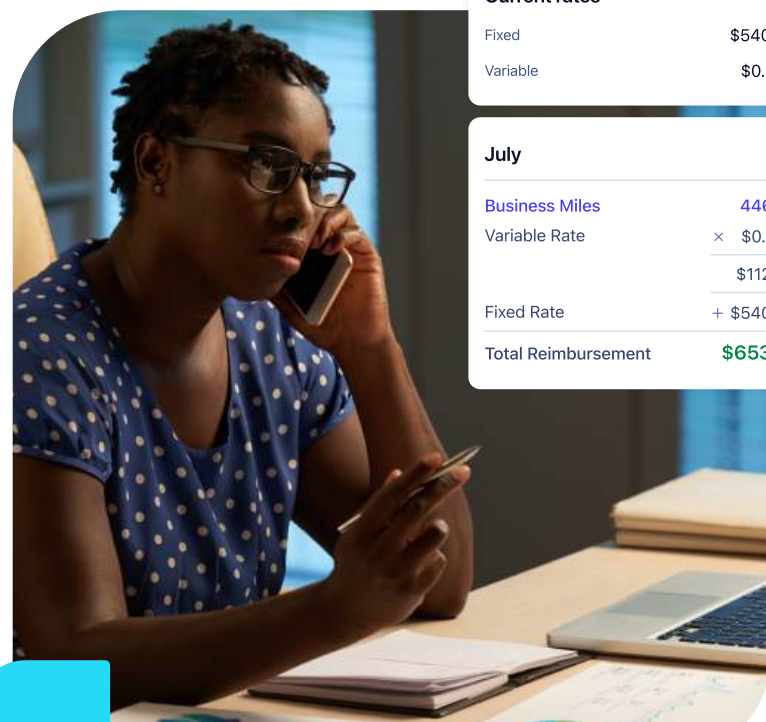

Program optimization saves the average company

+$3,000

per employee each year

How Does It Work?

Cardata Mileage Capture App | Cloud Web Portal

1 Employees capture mileage automatically using the Cardata Mobile app.

2 Cardata calculates IRS-compliant reimbursements for each driver.

3 These reimbursements are then posted to Concur Expense, where drivers can submit with ease.

Reimbursement Methods

With 25 years of expertise, Cardata leverages IRS code and your company goals to design tax-free programs that fit.

Fixed & Variable Rate (FAVR)

The most popular choice for active drivers, FAVR reimburses for both fixed and variable expenses related to driving for work, offering accurate reimbursements to each driver relative to their zip code and job requirements. This regionally sensitive strategy allows organizations to offer fair market reimbursements to their drivers completely tax-free.

Cents per Mile (CPM)

Great for occasional drivers, Cardata replaces manual mileage logs with a Concur integrated mileage capture app, helping you pay for business mileage accurately and with ease. Mileage capture applications save employees a week of work per year when compared to manual methods, while avoiding mileage overclaims.

Tax-Free Car Allowance (TFCA)

Pay a flat rate, but cut the tax. TFCA offers an IRS-compliant method of reimbursement that enables organizations to offer an allowance component to employees with the potential to be 100% tax-free on reported mileage. Use Cardata's Concur Expense integrated mileage capture app to erode your tax bill.

What Our Users Have to Say

"
They've been invaluable partners, helping us navigate our challenges and get everything set up properly. We feel like we can talk to anyone at Cardata and get the support we need.
HR LEADER

"
The savings in year one were significant.
FINANCE LEADER

"
I have used other similar apps in the past but this one works the best.
USER, ENTERPRISE

"
I love that I don't have to turn it on and off. I can set my working hours and just roll with it.
